

Release and Dissemination of Research Results and Findings

Effective Date: October 1994	Policy Number: 07 RRI 1411
Applicability/Class: CNDH / O	Department: Administration
Date of Review: June 2020	Approval:

I. Purpose:

The Chickasaw Nation has the inherent sovereign authority to govern itself and to provide for the health and general well-being of the Chickasaw people. In this respect, the Chickasaw Nation shall administer its system of health service delivery according to the highest standards of ethics and professional conduct to ensure the best possible service to the people receiving health services under such authority.

Furthermore, the Chickasaw Nation recognizes the value of medical, social, and physical science research to the Chickasaw Nation, to the Chickasaw people, and to society in general. Therefore, the Chickasaw Nation may from time to time participate in research projects that are of value to the interests of the Chickasaw Nation, the Chickasaw people, and the Native Americans and Alaska Natives it serves.

The Chickasaw Nation has instituted an Institutional Review Board (IRB) to carry out the primary responsibility of reviewing and approving or denying any proposed living human subjects research. The IRB will operate under the coordination of the Chickasaw Nation Department of Health (CNDH).

II. Policy:

The CNDH shall assure that all results and findings of duly approved research are reviewed and cleared by the Chickasaw Nation Department of Health IRB (CNDH IRB) prior to any public release, dissemination or presentation of the same ([07 RRI1410 "CNDH Institutional Review Board" part III, section D,3](#)). It is specifically acknowledged and agreed by the parties that any and all research data and findings as generated and derived by virtue of the Investigator Agreement and research project shall be and sole ownership of same shall be retained and vested with the Chickasaw Nation.

Any and all use of data and findings, including genomic data, generated from research conducted within the Chickasaw Nation requires prior review and

approval by the CNDH IRB. This includes all secondary use of any data collected for research purposes.

III. Procedure:

- A. For the purposes of this policy, “publications” is defined as all written reports, papers, manuscripts, abstracts, and journal or book articles based on research conducted within the Chickasaw Nation. Oral, poster, or PowerPoint presentations are also included in this definition and covered by this policy, as are academic treatises such as theses and dissertations.
- B. Upon the completion of all duly approved research or data collection, the results, findings, and conclusions shall be submitted to the CNDH IRB for review prior to publication.
- C. **Review and approval of publications:** upon receipt of draft publications of research results and findings the IRB Chair shall submit the draft publication to an ad hoc publication sub-committee of designated persons, which may include the Chair and the Secretary of Health.
 - 1. Proposed publications will be assigned for review to an ad hoc sub-committee of at least two persons appointed by the Chair. These persons may or may not be CNDH IRB members or employees of the Chickasaw Nation. They should have knowledge relevant to the research field of study, to the relevant CNHD IRB policies, and have no conflict of interest.
 - 2. Proposed publications or presentations shall be submitted to the CNDH IRB at least two months prior to the date of publication or presentation. Exceptions to the deadline for submission may be granted at the discretion of the Chair or Secretary of Health on a case-by-case basis.
 - 3. The CNDH IRB shall be allowed forty-five days to review and publication and reply to the investigator. Implied or passive approval is not permitted.
 - 4. CNDH IRB will review for technical content and validity, organization of content, general readability, adherence to established policy, and assurance that the publication is high quality, reflecting creditably on the Chickasaw Nation.
 - 5. .
 - 6. Reviewers may offer recommendations or suggestions or request clarifications, alterations, or corrections.

7. Reviewers may disapprove, defer approval if significant revisions are recommended, or may approve with contingencies if recommendations are minor.
8. Conflicting recommendations or significant disagreement shall be discussed by the reviewer and the Chair. The Chair may request further discussion with the full IRB.
9. Decisions of the publication sub-committee will be communicated to the author/presenter via letter from the IRB Chair.
10. In instances where publication is not approved, author/presenter shall have the opportunity to discuss reasons for disapproval and recommendations with the IRB Chair and publication review sub-committee members.

- D. **Dissemination of findings:** CNDH IRB approval must be granted for each specific public release, dissemination, or presentation of the results, findings, and conclusions regardless of whether or not the Chickasaw Nation is mentioned by name. The CNDH IRB may determine the degree to which the Chickasaw Nation is identified or acknowledged in any particular publication or presentation.
1. Per policy all presentation or publication of data or results from approved research projects must be reviewed and receive prior approval by the CNDH IRB.
 2. Researchers should inform the CNDH IRB when invitations are received to present or participate in any forum.
 3. CNDH partnering departments should be involved as much as possible in making presentations.
 4. To extent feasible at least one CNDH partner actively involved in article should be co-author.
 5. .
 6. Researchers should develop one page summaries of relevant results and policy implications related to research activities.
- E. The CNDH IRB shall determine that no individual patient can be identified in the results, findings, or conclusions and that the rights and welfare of research participants are protected.
- F. The CNDH IRB shall determine that publications are consistent with the goals, intents, and interests of the Chickasaw Nation and its citizens, and that publications represent the Chickasaw Nation without unfair stigma or harm to the overall community, culture, or heritage of the Chickasaw

Nation.

- G. CNDH IRB has the authority to give final approval or recommend referral to higher level of authority.
- H. Multi-tribal data collected within the Chickasaw Nation should not be presented as representative of those tribes, only as representative of the individual participants.
- I. Title of presentations or individual slides should be clear as to whom and what is being represented; data should not be generalized to an entire tribe, only to the individual participants in the research project.
- J. This policy does not apply to internal Chickasaw Nation presentations for the purpose of teaching, quality assurance or improvement, or non-research publications or presentations.
